

# 5155

## 21-Spindle Line Boring

A **MASSIVE AIR** cylinder easily provides the drilling force needed for the 21 spindle gear head.

**TWO GUIDE PINS** are mounted into the boring head for repetitive operation.

**TWO SPRING LOADED** pressure feet keep the material firmly planted throughout the drilling operation.

- Large table provides an excellent work surface.
- Durable phenolic table prevents scratching of the work surface.
- Large air cylinder provides ample force for all boring needs.
- Quick connect drill chucks assist in quick tool changes.
- Convenient foot pedal controls the entire boring cycle.
- Spring loaded pressure feet securely clamps the work piece in place.
- Two guide pins are provided for repetitive operations.
- Mechanical DRO for precise boring head adjustment.
- Rear fence includes multiple stops for quick set-up.
- Powerful 2.5HP single phase motor.

**OPTIONAL REAR FENCE** extended for added capacity.

Model No.	5155
Stock No. (2 HP, 1 Ph)	5155.001
Table Size	19" x 47-1/4"
Max. Drilling Depth	3"
Max. Distance Between Center	32mm
Compress Air Required	85-110 PSI
Number of Spindles Per Boring Head	21
Quick Chuck	21 Pieces
Motors	2.5 HP, 1 Ph (9 AMPS)
Footprint	34-1/2"L x 25" W
Gross Weight	440 lbs
Overall Dimensions	88"L x 52"W x 62"H
